Project Rationale:

Goals of the project include:

- Creation of an all-ages, all-abilities, year-round pathway connection for walking and cycling to established communities in Canmore west of the Bow River
- Enable a greater proportion of residents and visitors to take a proportion of travel trips by foot and bicycle in support of our Municipal Development Plan, Integrated Transportation Plan, and Integrated Parking Management Plan goals.
- Upgrade facilities in a way that accommodates future growth and requirements in the area.

END.

Options Considered:

Mixed use and separate facilities will be considered for the various segments of the pathways as is required, along with staging considerations.

Pedestrian bridges will be replaced with steel structures, rather than glue laminated wooden structures, to address operational issues with maintaining wood over waterways.

END.
