

ADDENDUM 01: Wildfire Risk Mapping Project RFP

Reference Number: PS-2025-08

1. Could you please share a link to Calgary's risk map that was mentioned in the proposal?

The Town of Canmore has a copy of the Calgary Wildfire Risk Management Plan for the Calgary Forest Area, we are anticipating that this can be shared with the successful proponent. The Town is unable to share this document publicly as it is not a Town of Canmore document.

2. Does the town of Canmore have existing GIS layers or data available for the following categories?

A. Critical Assets –

Yes, this was developed as part of the Town's Flood Emergency Response Plans and can be circulated in full or in part to the successful proponent.

B. Asset Values

No, this is not included in our GIS layers. We have rough estimates for several assets as part of the Town's asset register (excel file), information is dated by several years. The Town has tax assessment values for individual parcels in GIS. Simplified methods for estimating high level asset values are recommended.

C. Economic Drivers

No, however zoning information (commercial, residential, industrial) is available.

D. Environmentally Sensitive Areas

No – however, we had landcover layers that show wildlife corridor, habitat patches, waterbodies, etc. We can also pull from external agencies such as [Bow River Regional Wetland Datasets - Home](#)

E. Social Vulnerabilities

No, some of this information was gathered during engagement sessions with key service providers during the development of the [Emergency Response Plans for Extreme Heat and Wildfire Smoke](#) and the [Climate Emergency Action Plan](#). It is expected that federal and provincial datasets are accessed to fully evaluate

vulnerabilities within the community. Engagement with key stakeholders in this field is also possible/recommended.

3. Is the Calgary Forest Area Wildfire Risk map and methodology, referenced in RFP, publicly available and can it be shared?

(Section 3.0, Item 3.2.1)

The Town of Canmore has a copy of the *Calgary Wildfire Risk Management Plan* for the Calgary Forest Area, we are anticipating that this can be shared with the successful proponent. The Town is unable to share this document publicly as it is not a Town of Canmore document.

4. Does the Town of Canmore have access to recent wildfire fuel layers or is there an expectation that these will be generated as part of the project?

(Section 3.0, Item 3.2.1)

The Town has Wildfire Fuel Behaviour Potential mapping GIS files that can be shared. Below is a screenshot of what they look like.
